- (2) **Government Regulation Risk** - Government policies or regulations are more prevalent in some securities and financial instruments than in others. Funds that invest in such securities may be affected due to change in these regulations or policies, which directly or indirectly affect the structure of the security and/or in extreme cases a governmental or court order could restrain payment of capital, principal or income.
- (3) **Credit Risk** - Credit Risk comprises Default Risk and Credit Spread Risk. Each can have negative impact on the value of the income and money market instruments including Sukuks etc:
 - **Default Risk** - The risk that the issuer of the security will not be able to pay the obligation, either on time or at all;
 - **Credit Spread Risk** - The risk that there may be an increase in the difference between the return/markup rate of any issuer's security and the return/markup rate of a risk free security. The difference between this return/mark up rates is called a "credit spread". Credit spreads are based on macroeconomic events in the domestic or global financial markets. An increase in credit spread will decrease the value of income and including money market instruments;
- (4) **Price Risk** - The price risk is defined as when the value of the Fund, due to its holdings in such securities rises and falls as a result of change in interest rates.
- (5) **Liquidity Risk** – Liquidity risk is the possibility of deterioration in the price of a security in the Fund when it is offered for sale in the secondary market.

- (6) **Settlement Risk** – At times, the Fund may encounter settlement risk in purchasing / investing and maturing / selling its investments which may affect the Fund's performance etc.
- (7) **Reinvestment Rate Risk** –In a declining interest/ markup rate economic environment, there is a risk that maturing securities or coupon payments will be reinvested at lower rates, which shall reduce the return of the Fund compared to return earned in the preceding quarters.
- (8) **Events Risk** - There may be adjustments to the performance of the Fund due to events including but not limited to, natural calamities, market disruptions, mergers, nationalization, insolvency and changes in tax law.
- (9) **Redemption Risk** - There may be special circumstances in which the redemption of Units may be suspended or the redemption payment may not occur within six working days of receiving a request for redemption from the investor.

Scheme Specific Risks

- I. **Mismatch Risk** – This risk pertains to the event where in case of a Bond Event there is no risk free instrument available for the Fund to invest in that offers the same yield, or same maturity as required for Capital Protection at maturity.
- II. **Gap Risk** – This risk pertains to the Gap event where the Portfolio Value falls below the Bond Floor of the capital protection amount required at maturity.
- III. The performance of the Fund may be affected by changes in risk associated with trading volumes, liquidity and settlement systems in equity and debt markets.
- IV. Unit-holders are not being offered any guaranteed returns.
- V. As the allocation of portfolio changes from equity component to full income component consequent to steep fall in equity markets which results in fall in Portfolio Value below the Bond Floor of the capital protection amount required at maturity, there may be no participation in subsequent upward movement in the equity component while the Fund remains invested entirely in the income component and as a result the fund would not get upside of equity market once the Bond Floor hit.
- VI. **Inflation risk** - The investment into units of the fund is subject to inflation risk due to the possibility of such investment not growing proportionately to the inflation rate and thus decreasing the investor's purchasing power even though the investment in monetary terms has increased.
- VII. **Early termination risk** - If the Fund for any reasons as determined by the Management Company, is terminated, the NAV of the Fund will be subject to fluctuations in the value of the Fund's assets. The Net Asset Value, in this case, may be lower or higher than the Initial Investment Value. The Management Company will refund investors their investment in the Fund based on the NAV per unit without any redemption fee but less bank and administrative charges (if any).
- VIII. Break down of law and order, uncertain political & economic condition, war, terrorist activity, natural disasters and other activities of this type.

- IX. Mismanagement of the investee company, third party liability whether through class action or otherwise or occurrence of other events such as strikes, fraud etc., in the company in which the investment is made;
 - X. Break down of communication systems of the issuers, stock exchanges, clearing house, depository company, etc, or general disruption of satellite system;
 - XI. Any government or court orders restraining payment of principal/capital and income; and
 - XII. Senior rights of some creditors over other creditors in the event of winding up.
- 2.5.1 There may be times when a portion of the investment portfolio of the Scheme is not compliant either with the investment policy or the minimum investment criteria of the assigned 'category'. This non-compliance may be due to various reasons including, adverse market conditions, liquidity constraints or investment – specific issues. Investors are advised to study the latest Fund Manager Report specially portfolio composition and Financial Statements of the Scheme to determine what percentage of the assets of the Scheme, if any, is not in compliance with the minimum investment criteria of the assigned category. The latest monthly Fund Manager Report as per the format prescribed by Mutual Funds Association of Pakistan (MUFAP) and financial statements of the Scheme are available on the website of the Management Company and can be obtained by calling / writing to the Management Company.
