February 28, 2025
PERSPECTIVE

Economy Review & Outlook

The country's exports during February 2025 decreased by 5.6% year on year (YoY) to USD 2.44 billion, while imports increased by 10.0% to USD 4.74 billion, widening the trade deficit by 33.4% to USD 2.30 billion. With remittances expected to remain healthy, the country may witness a modest current account deficit for the month. Nonetheless, the cumulative current account surplus in the first seven month of Fiscal year 2025 stands at USD 682mn with Pakistan poised to post the first annual current account surplus since FY11. SBP reserves witnessed a dip of USD 200mn to USD 11.2bn during the month as the country retired some of its foreign debts. The local currency depreciated slightly by 0.3% against the greenback to close at 279.7 level.

CPI based inflation for February 2025 clocked at 1.5% down from 2.4% witnessed in January 2025 mainly due to base effect. This was the lowest reading since September 2015. The core inflation clocked at 8.8% similar to last month. We expect inflation to remain in low single digits in the upcoming months with some uptick by the end of fiscal year. We anticipate CPI to average around 5.3% in FY25 compared to 23.4% in FY24. On the fiscal side, FBR tax collections rose by 26.0% in the first eight months of FY25, reaching PKR 7,346 billion—falling short of the target by PKR 601 billion.

Money Market Review & Outlook

The short-term secondary market yields increased by 11 bps while longer tenor yields rose by 8 bps during the month. The yields inched up due to market expectation of potential status quo in the upcoming monetary policy in March 2025. SBP conducted the Treasury bill auction on February 19, 2025. The auction had a total maturity of PKR 371 billion against a target of PKR 350 billion. SBP accepted total bids worth PKR 141 billion in 3 months, PKR 25 billion in 6 months and PKR 79 billion in 12 months' tenors at a cut-off yield of 11.82%, 11.68% and 11.65% respectively. The cut off yields were up by an average of 26bps from the auction conduction last month. The auction for fixed coupon PIB bonds was held on February 12, 2025. The auction had a total maturity of 63 billion against a target of PKR 350 billion. SBP accepted bids worth PKR 95 billion in 2 Years, PKR 8 billion in 3 Years, PKR 242 billion in 5 Years and PKR 131 billion in 10 years at a cut off rates of 11.69%, 11.89%, 12.39% and 12.79%, respectively.

Going forward, the stability in currency and favorable base effect should support the inflation outlook with inflation remaining in low single digits in the upcoming months with some uptick by the end of fiscal year. The SBP has decreased interest rates by a cumulative 1,000bps since June 2024 as interest rates have declined to 12.0% from a high of 22.0%. We believe that SBP could pause the easing cycle to evaluate the monetary transmission effect of the interest rate decline. In our base case, we have assumed the interest rate to remain at similar level in the near future. However, if the data points are better than expected the interest rates can potentially dip by another 100bps further.

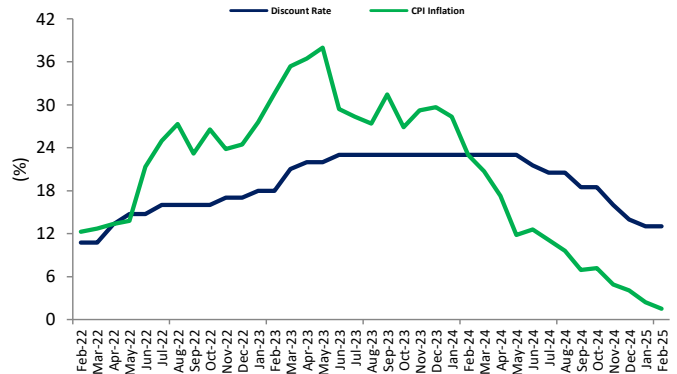

Equity Market Review & Outlook

The KSE-100 index started the month of February 2025 on a negative note, falling by 3,954 points (-3.5% return) to 110,301 points led by selling pressure and profit taking. However, the market witnessed a recovery in the latter part of the month, driven by news of a USD 40 billion lending package from the World Bank under the Country Partnership Framework. Additionally, the initiation of talks for an additional USD 1 billion in climate resilience funding from the IMF helped restore investors' confidence. As a result, the market recouped most of its earlier losses, closing at 113,251 points, down 1,004 points (-0.9% MoM).

The market activity remained lackluster as average traded volume decreased by 22% MoM to 529mn shares while the average traded value declined by 26% MoM to USD 88mn. On the flows front, foreign investors remained net sellers, recording a net outflow of USD 28.1 million. Among local participants, Individuals emerged as net sellers, with outflows of USD 9.7 million. Meanwhile, buying activity was observed from Insurance, Mutual Funds and Companies, which registered net inflows of USD 16.2 million, USD 9.2 million and USD 6.3 million, respectively. On the Sectoral Front, the Investment Co., E&Ps, and Tech made negative contributions of -834, -582, and -428 points, respectively. While positive contribution was seen from Cement, Fertilizer, and Power with cumulative points contribution of 1,406 points.

In the short-term market participants will closely monitor macroeconomic indicators and the government's efforts to comply with EFF facility conditions ahead of the next IMF review in March 2025. Additionally, local and geopolitical upheavals will impact the market's direction, along with the SBP's monetary policy stance following the recent rate cuts over the last several months. We reiterate our strong stance as the market is still trading at a discount from historical levels, evident from a forward Price to Earnings ratio of 7.0x and a dividend yield of 7.8%. These attractive valuations present compelling opportunities for investors with a medium to long-term horizon.

Investment Objective

To generate risk adjusted returns by investing in short, medium and long-term Shariah Compliant Fixed Income instruments.

Manager's Comment

During the month, the fund generated an annualized return of 9.54% against its old benchmark return of 8.98% and new benchmark return of 9.87%. WAM of the fund was 1.7 years at month end.

In order to maintain a strong credit profile, the fund has been prudent in its risk policies and has avoided taking exposure in a number of weak credit corporate debt instruments offering a higher yield including some from power, banking, microfinance and miscellaneous sectors .
