June 30, 2026
PERSPECTIVE

Economy Review & Outlook

Pakistan's exports declined by 9.6% year-on-year in June 2026 to USD 2.2 billion, while imports increased by 26.3% year-on-year to USD 6.8 billion. As a result, the trade deficit widened sharply by 57.1% year-on-year to USD 4.5 billion. However, the forward-looking external account outlook has improved, supported by a sharp decline in international oil prices, which have eased to around USD 70/bbl from a peak of nearly USD 120/bbl. Lower oil prices are expected to reduce inflationary pressures, contain the import bill, and help keep the current account deficit manageable. Reflecting these positive developments, the Pakistani Rupee extended its winning streak for the twelfth consecutive month, appreciating marginally by 0.1% to close at PKR 278.2 against the US dollar.

On the inflation front, CPI-based inflation eased to 11.1% in June 2026 from 11.7% in May 2026, while core inflation moderated to 8.4% from 8.8% in the previous month. The decline in headline inflation was primarily driven by lower fuel prices, supported by the recent fall in international oil prices. Average CPI inflation for FY26 settled at around 7.0%, compared to 4.6% in FY25. On the fiscal side, FBR tax collection increased by 10.7% during FY26 to PKR 13,004 billion, exceeding the twice downward-revised target by PKR 21 billion.

Money Market Review & Outlook

Secondary market yields declined across the curve, with short-term yields falling by 49 bps and long-term yields decreasing by 69 bps. The decline was primarily driven by easing international oil prices, following a reduction in Middle East tensions that eventually culminated in a ceasefire agreement between the US and Iran. In its monetary policy meeting held on June 15, 2026, the Monetary Policy Committee (MPC) decided to keep the policy rate unchanged at 11.5%. The Committee noted that global oil prices had eased following recent positive geopolitical developments, which supported the decision to maintain the status quo.

SBP conducted the Treasury bill auction on June 23, 2026, with total maturities of PKR 1,497 billion against a target of PKR 1,200 billion. The central bank accepted bids worth PKR 160 billion in the 1-month tenor, PKR 246 billion in the 3-month tenor, PKR 193 billion in the 6-month tenor, and PKR 558 billion in the 12-month tenor at cut-off yields of 11.80%, 11.75%, 11.75%, and 11.84%, respectively. Meanwhile, the fixed-rate PIB auction was held on June 17, 2026, against a target of PKR 350 billion. SBP accepted bids worth PKR 5 billion in the 2-year tenor, PKR 170 billion in the 3-year tenor, PKR 350 billion in the 5-year tenor, and PKR 124 billion in the 10-year tenor at cut-off yields of 12.14%, 12.09%, 12.19%, and 12.61%, respectively.

Going forward, developments in the Middle East are likely to remain a key driver of macroeconomic variables and, by extension, the monetary policy outlook. We expect the central bank to maintain a data-dependent approach in shaping upcoming policy decisions. However, the recent decline in oil prices has opened some room for monetary easing over the medium term.

Equity Market Review & Outlook

The Pakistan Stock Exchange (PSX) extended its recovery in June 2026, with the KSE-100 Index advancing by 6,339 points, or 3.6% MoM, to close at 180,302 points, marking the third straight month of gains. Consequently, the benchmark index concluded FY26 with a robust return of 43.5%, marking the third consecutive year of positive returns.

Market sentiment was supported by improving global geopolitical dynamics, particularly the ceasefire between the US and Iran announced in mid-June. This development eased regional geopolitical concerns and led to a notable decline in international oil prices, further strengthening investor sentiment and supporting equity valuations. On the domestic front, sentiment was further reinforced by a better-than-expected FY27 Federal Budget, which included a reduction in Super Tax for selected sectors, enhancing earnings visibility. Additionally, the State Bank of Pakistan's decision to maintain the policy rate provided further confidence in macroeconomic stability, complementing the positive external environment.

During June 2026, average daily traded volume increased by 18.0% to 836.4 million shares, while average daily traded value improved by 27.0% to USD 142.0 million, as investors gained greater clarity on the geopolitical environment. On the flows front, foreign investors remained net sellers, recording an outflow of USD 182.3 million, while Insurance and Individuals also posted net selling of USD 56.3 million and USD 25.9 million, respectively. Meanwhile, the selling was largely absorbed by Companies and Mutual Funds, which collectively recorded a net inflow of USD 276.7 million. From a sectoral perspective, the bulk of the market's gains originated from Commercial Banks, Cement, and Investment Companies, which cumulatively contributed 3,328 points to the index.

Looking ahead, market performance is expected to remain sensitive to developments in the Middle East and their implications for global commodity prices and Pakistan's external account. Domestically, investors are likely to closely monitor the State Bank of Pakistan's monetary policy trajectory, and the upcoming corporate earnings season, all of which will play a crucial role in shaping near-term market direction. Nonetheless, we maintain a positive outlook on equities, supported by improving macroeconomic fundamentals and attractive market valuations. The benchmark index is currently trading at a forward Price-to-Earnings ratio of 8.1x, while offering a dividend yield of 6.1%.

Manager's Comment

During the month the fund posted an annualized return of 12.38% against its benchmark return of 11.39%. WAM of the fund was 422 Days. Exposure in T-bills increased and Allocation in Cash decreased during the month.

In order to maintain a strong credit profile, the fund has been prudent in its risk policies and has avoided taking exposure in a number of weak credit corporate debt instruments offering a higher yield including some from power, banking, microfinance and miscellaneous sectors.

Investment Objective

The objective of MCB-PSF is to deliver income primarily from investment in government securities

Manager's Comment

During the month, the fund generated an annualized return of 14.58% as against its benchmark of 11.79%. WAM of the fund was 237 Days.

Contrary to the increasing tendency in the industry to add corporate debt instruments, MCB-PSF is among the few Bond Funds in the industry which continues to remain restricted to pure government securities and bank deposits inline with the name of fund.
