October 31, 2026

PERSPECTIVE

Economy Review & Outlook

During the month, positive developments were witnessed on the economic front, with Saudi Arabia confirming the rollover of USD 3.0 billion in deposits maturing in October 2026. Meanwhile, SBP's foreign exchange reserves remained stable at around USD 21.5 billion, marking an all-time high. The Pakistani Rupee also maintained its appreciation trend for the sixteenth consecutive month, strengthening marginally by 0.1% MoM to close at PKR 276.8/USD.

On the inflation front, headline CPI inflation eased to 9.61% YoY in October 2026 from 10.26% in September 2026, while core inflation declined to 7.52% from 8.40% in the previous month. We expect average CPI inflation to settle at around 9.3% in FY27, compared with 7.0% in FY26. However, the inflation outlook remains highly sensitive to geopolitical developments and movements in international oil prices. On the fiscal front, FBR tax collection increased by 6.5% YoY during 4MFY27 to PKR 4,089 billion, missing the cumulative target by PKR 96 billion.

Money Market Review & Outlook

Secondary market yields increased across the curve during the month, with short-term yields rising by 61 bps, while long-term yields remained relatively stable, increasing by just 3 bps. The upward movement was primarily driven by the State Bank of Pakistan's decision to increase the policy rate by 50 bps to 12.0% in October 2026. The Monetary Policy Committee (MPC) highlighted that escalating tensions in the Middle East have kept global energy prices elevated, posing upside risks to inflation. Accordingly, the MPC deemed the rate hike necessary to anchor inflation expectations, contain second-round effects of the ongoing supply shock, and steer inflation towards the medium-term target range of 5–7%, while preserving macroeconomic stability.

SBP conducted the Treasury bill auction on October 28, 2026, with total maturities of PKR 1,195 billion against a target of PKR 1,650 billion. The central bank accepted bids worth PKR 536 billion in the 1-month tenor, PKR 855 billion in the 3-month tenor, PKR 219 billion in the 6-month tenor, and PKR 231 billion in the 12-month tenor at cut-off yields of 12.11%, 12.43%, 12.65%, and 12.89%, respectively. Meanwhile, the fixed-rate PIB auction was held on October 07, 2026, with total maturities of PKR 20 billion against a target of PKR 350 billion. SBP accepted bids worth PKR 0.7 billion in the 2-year tenor, PKR 220 billion in the 3-year tenor, PKR 131 billion in the 5-year tenor, and PKR 25 billion in the 10-year tenor at cut-off yields of 12.80%, 12.75%, 12.90% and 12.85%, respectively.

Going forward, developments in the Middle East and their implications for international oil prices are likely to remain key drivers of Pakistan's inflation, external account, and monetary policy outlook. Accordingly, we expect the central bank to maintain a data-dependent approach in shaping upcoming policy decisions.

Equity Market Review & Outlook

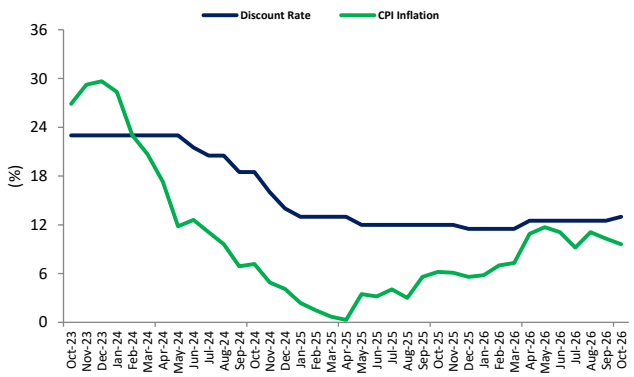

The benchmark KSE-100 Index remained under pressure for a second consecutive month, declining by 3,560 points, or 2.1% MoM, to close October 2026 at 166,409 points. Market sentiment remained subdued amid renewed escalation in the US-Iran conflict, with attacks on commercial shipping in the Strait of Hormuz and Houthi strikes on Saudi energy infrastructure raising concerns over regional oil supply disruptions. These developments pushed Brent crude prices up by 13.6% MoM to USD 117.6/bbl, their highest monthly closing level since April 2026, further heightening concerns over Pakistan's inflation and external account outlook. Adding to the pressure, the State Bank of Pakistan raised the policy rate by 50 basis points to 12.0%, citing elevated energy prices and geopolitical uncertainty. While Pakistan reached a staff-level agreement with the IMF on the fourth EFF and third RSF reviews, the positive development was largely overshadowed by persistent geopolitical risks.

During October 2026, average daily traded volume declined by 21.8% to 472.2 million shares, while average daily traded value decreased by 20.1% to USD 70.2 million, reflecting subdued investor participation amid heightened uncertainty. On the flows front, foreign investors and Mutual Funds remained net sellers, recording outflows of USD 48.8 million and USD 42.7 million, respectively. The selling was largely absorbed by Individuals, Companies and Banks/DFIs, which collectively recorded net inflows of USD 77.2 million.

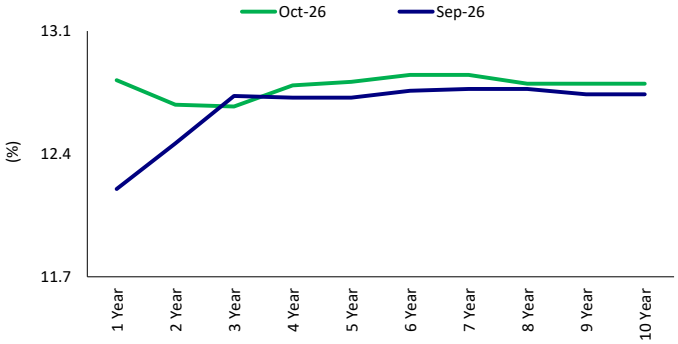

From a sectoral perspective, Commercial Banks, Technology & Communication, and Cement were the largest drags on the KSE-100 Index, collectively contributing a decline of 2,169 points. This was partially offset by gains in Fertilizer, Oil & Gas Marketing Companies, and Tobacco, which cumulatively contributed 608 points to the index.

Looking ahead, market performance is expected to remain sensitive to developments in the Middle East, particularly the trajectory of the US-Iran conflict and its implications for global oil prices and Pakistan's external account. Domestically, investors are likely to monitor the IMF Executive Board's approval of the latest reviews, the State Bank of Pakistan's monetary policy trajectory, and the sustainability of improving macroeconomic fundamentals. Nonetheless, we maintain a positive outlook on equities, supported by continued progress on the reform agenda, improving sovereign fundamentals, and attractive market valuations. As of end-October, the benchmark index was trading at a one-year forward Price-to-Earnings ratio of 7.1x, while offering a dividend yield of 7.0%.

Investment Objective

The objective of ALHIIF is to generate risk adjusted returns by investing in short, medium and long-term Shariah Compliant Fixed Income instruments.

Manager's Comment

During the month, the fund generated an annualized return of 6.37% against benchmark return of 9.87% . WAM of the fund was 2 years at month end.

In order to maintain a strong credit profile, the fund has been prudent in its risk policies and has avoided taking exposure in a number of weak credit corporate debt instruments offering a higher yield including some from power, and miscellaneous sectors .
