Manager's Comment

During the month, the fund generated a return of 14.47% against benchmark return of 20.71%. PIB allocation increased during the month. WAM of the fund was 2.2 years at month end.

In order to maintain a strong credit profile, the fund has been prudent in its risk policies and has avoided taking exposure in a number of weak credit corporate debt instruments offering a higher yield including some from power, banking, microfinance and miscellaneous sectors.
